

Brecon Beacons National Park

Forecast valid from 00:00 on Tuesday 10 May 2022 until 23:59 on Wednesday 11 May 2022

Forecast Issued on Monday 09 May 2022 at 15:15

Confidence: High confidence for more changeable conditions over the next couple of days, but there is large uncertainty in the track of a low pressure system on Wednesday, resulting in low confidence in the timing and details of associated wind and rainfall. Higher confidence for more settled breezy conditions to end the week.

Headline for Tuesday 10 May 2022: Overnight rain clearing to a breezy day with sunny spells and scattered showers.

Forecast for Tuesday 10 May 2022

Weather: Outbreaks of rain and drizzle during the early hours will ease and clear before dawn. Tuesday morning will be a mix of sunny spells and scattered showers, with the showers becoming isolated mid-afternoon onwards. Dry with clear spells during the evening.

Chance of cloud-free hill tops above 600m: 10% or less in rain at first, improving to 90% as the rain clears.

Low cloud and visibility: Extensive low cloud covering slopes above 400m during the early hours will lift and break to scattered cloud base 800-900m as the rain and drizzle clears. Cloud will temporarily increase and lower to broken amounts nearer 700m in any showers, especially over exposed west facing slopes during the morning. Visibility generally a few km at best in early rain and drizzle, but improving to generally good beneath cloud once the rain clears, with only brief deteriorations in showers.

Meteorologist's View

Strong winds throughout the day will make it feel chilly on the summits, and some warm layers are recommended. Strong sunshine will bring high UV levels, especially in the afternoon and sun protection is advised.

Forecast for Wednesday 11 May 2022

Weather: Breezy with bright spells and a few showers at first on Wednesday, but cloudier in the afternoon with outbreaks of rain and drizzle developing. Some heavier bursts of rain are possible mid-afternoon onwards, but the rain should ease during the evening.

Maximum wind: West to southwest 25-30mph gust 40mph.

Chance of cloud-free hill tops above 600m: 80% falling to 40% in the rain and drizzle.

Low cloud and visibility: Cloud bases generally clear of the summits, but scattered cloud briefly lowering to 700-800m in any showers. Areas of low cloud may develop on slopes around 400-500m in any rain and will only lift slowly as the rain eases later. Visibility generally good beneath cloud, with only brief deteriorations in showers, but dropping to a few km in rain and drizzle.

Temperature: **Valleys:** Plus 9 Celsius becoming plus 15 Celsius.
At 600m: Plus 8 Celsius.
Freezing level: Above the summits.
